

ABOUT TRANSKUR DEO

KEY INFORMATION

Transkur Deo Spray **reduces excessive sweating** and ensures that **unpleasant body odors are not formed**. Transkur Deo Spray has a unique composition with sweat-inhibiting and odor-inhibiting components. Transkur Deo Spray will not completely block sweat formation and is therefore safe to use.

COMPOSITION

- **Aluminum chlorohydrate**
Inhibits perspiration. Less irritating and more pleasant to use than Aluminum chloride.
- **Citronellyl Methyl Crotonate**
Neutralises odor by acting as a substrate for bacterial enzymes.
- **Saccharomyces Ferment**
Neutralises odor by converting badly smelling substances into odorless salts.
- **Octenidine HCl**
Disinfectant effect against bacteria that cause body odor.

No parabens, lanolin, perfume, sodium laurylsulphate

INDICATIONS

Transkur Deo Spray has been developed for adults and children from 12 years old.

REGULATORY STATUS

- Cosmetic product (EU CPNP notified)
- Manufactured in a GMP plant in Belgium

USPs

- Unique combination of sweat-inhibiting and odor-inhibiting components.
- Can be combined with a standard perfume, eau de toilette or scented deodorant spray.
- Less irritating than most antiperspirants on the market.
